

Nebula In a Jar Necklace

Teen-To-Go

1

Gather your supplies: glitter, cotton ball, necklace cord, small jar with stopper, Qtip, two paint colors, gel super glue, syringe, water and paper towel

3

Dip the Qtip into one paint color, then swish in the jar. If you want it darker, repeat the step.

5

Dip a Qtip into the other paint color. Add this new color to the jar by dabbing it onto the cotton ball already in the jar. Do this a few times. Then add some more cotton and glitter.

2

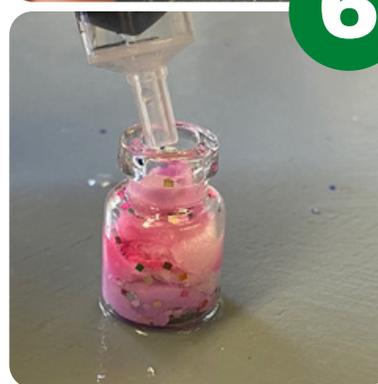

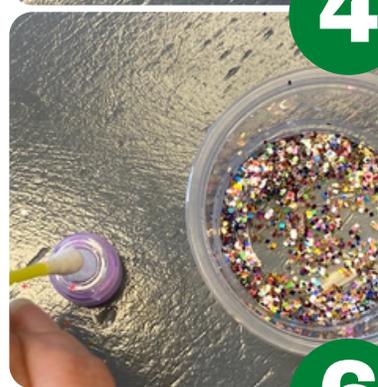

Tear the cotton ball into tiny pieces and set aside. Using the syringe, add water to the jar, about 1/3 of the way up.

4

Roll a piece of cotton ball in glitter, then using the clean side of a Qtip, press into the jar. Repeat with two more pieces of cotton ball. You can always add pinches of glitter!

6

Fill the jar with water just barely to the neck of the jar. You need to leave space for the stopper!

7

Protect the surface with a paper towel, then add super glue just inside the rim of the jar. The super glue is a gel form and should not run. Then press the stopper in place.

8

Feed the chain end of the necklace through the stopper eyelet charm. Make sure your stopper is glued securely before wearing!

Notes:

If you have glue that comes up over the stopper, use a Qtip to wipe it away quickly. Be careful not to get your fingers stuck!
